

Rule
1.126
↓
antigen has a molecular weight selected from the group consisting of 250 kD, 160 kD, 150 kD, 31 kD, 26 kD and 14 kD, as determined by SDS-PAGE, and said antigen does not cross-react immunologically with prostate-specific antigen.

36
37. The composition of claim 36, wherein said proliferation-incompetent cell is autologous.

37
38. The composition of claim 36 wherein said proliferation-incompetent cell is allogeneic.

C1
38
39. The composition of claim 36, wherein said GM-CSF is expressed by a second non-cancerous cell.

39
40. The composition of claim 36, wherein said antigen has a molecular weight of 250 kD.

40
41. The composition of claim 36, wherein said proliferation-incompetent cell is a prostate cell.

41
42. The composition of claim 36, further comprising a host cell, wherein said antigen is expressed at the surface of said host cell.
